

EUGER BONETE JR.

FULL-STACK DEVELOPER

Barosbos Carles Iloilo • 09459650989 • eugerbone@gmail.com

<https://bonete.euger.workers.dev/> • <https://www.facebook.com/euger.bonete.9>

SUMMARY

Full-Stack Developer shipping production web applications in the React/TypeScript/Next.js ecosystem. I specialize in translating Figma designs into type-safe, production-ready interfaces and have delivered across hiring tech, fintech, and SaaS platforms. Currently diving deep into AI-assisted and agentic development, actively learning Claude Code, MCP Servers, and agentic coding workflows. Graduated with a BS in Information Technology in 2025 and available for new client work.

WORK EXPERIENCE

Freelance Full-Stack Developer

2023 - Present

- **Viafide** (2026) - Built AI-powered job matching UI and candidate resume builder with Next.js and Supabase, implemented masked-profile and skill verification features for bias-free hiring.
- **Novu** (2026) - Built real-time live chat infrastructure with Supabase Realtime; integrated Claude API for AI-assisted agent responses and built team dashboards, knowledge base, and embeddable chat widget.
- **Global Talent Portal** (2025) - Built the full company website and landing page, translating brand identity into a responsive, animated interface with Framer Motion and Tailwind CSS; deployed on Cloudflare
- **Ciptax Pro** (2025) - Built browser-based tax calculators covering Malta IRD and Philippine BIR regulations using Next.js, React Hook Form, and Zod.
- **Rocketshyft** (2023) - worked as a frontend developer using with React and TypeScript on an all-in-one workforce scheduling platform that automates employee scheduling, shift management, availability tracking, and schedule optimization.

Freelance Bubble.io Web Developer

May 2022 -September 2022

- Collaborated with designers to transform Figma designs into responsive and user-friendly web applications using Bubble.io.
- Customized workflows, components, and application logic to match complex design and business requirements.
- Worked closely with teams to deliver polished and intuitive user experiences.

Frontend Engineer Intern at Digipay

April 2021 - October 2021

- Participated in daily stand-up meetings and agile development workflows.
- Migrated legacy HOC patterns to React Hooks across the dashboard codebase, improving component reusability and reducing complexity.
- Implemented a new UI design kit to modernize the post-login dashboard, rebuilding views with updated components and a consistent visual language.

PROJECTS

Portfolio Website

Personal portfolio website
